SUMMARY

Vanilla Web Developer and Video Editor with hands-on experience building browser-based tools using HTML5, CSS3, and JavaScript — zero frameworks, zero dependencies. AI tools enthusiast with **15+ certifications** spanning Generative AI, prompt engineering, and design. Currently pursuing **BCS at COMSATS University Islamabad, Wah Campus**. Delivered client video projects and built deployed web applications integrating multi-provider AI APIs.

EXPERIENCE

Zulal-e-Khizar Foundation

Co-Director, Graphics Team

2024 – Present

Volunteer | Non-Profit

- Lead graphic design direction for campaigns, events, and social media content.
- Directed design workflow and mentored junior designers on the graphics team.
- Produced visual assets for the “**Path of Humanity**” event – medical camp, orphanage, and old-age home outreach.
- Collaborated with core team for content planning and execution across multiple initiatives.

KIPS MDCAT PREP

Video Editor & Content Manager

2023 – 2024

YouTube Channel

- Created and edited educational lecture videos for an MDCAT preparation YouTube channel.
- **Grew the channel to 20,000+ subscribers** and achieved monetization **within one month**.
- Implemented SEO strategies – titles, descriptions, tags – to maximize video discoverability.
- Managed upload scheduling, thumbnail design, and content calendar independently.

Freelance Video Editor

Client Work | Video Production

2023 – 2024

Remote

- Delivered **4 complete video projects** for a developer client – educational tech content series.
- Produced: [Frontend Web Dev Roadmap](#), [Intro to Programming](#), [Variables in Programming](#).
- Handled end-to-end production: editing, motion graphics, color grading, and final export.

PROJECTS

Coloristan | Vanilla HTML5, CSS3, JavaScript | coloristan.vercel.app

- Built a minimal browser-based tool to identify color names and convert between HEX, RGB, HSL, and OKLCH formats.
- Implemented smart autocomplete search across a handpicked database of **100+ named colors**.
- Deployed on Vercel – zero backend, zero dependencies, fully client-side.

What's Next? | Vanilla JS, Groq, Anthropic, Mistral, Moonshot AI | github.com/zakiuhh/what-s-next

- Engineered a BYOK career advisor generating **12 personalized suggestions** across career, courses, projects, and books.
- Integrated **4 AI providers** – Groq, Anthropic, Kimi, and Mistral – with live model fetching per provider.
- Built in Vanilla JS – no frameworks, no bundler, no server. Deployed on Vercel.

DECKY CAP Docs | Vanilla HTML5, CSS3, JavaScript | github.com/zakiuhh/deckyDocu

- Designed and developed a **9-section single-page documentation site** for a conceptual autonomous aerial platform.
- Implemented custom magnetic cursor physics, IntersectionObserver scroll animations, collapsible sidebar with localStorage persistence, and live accent color picker.
- Built keyboard navigation, responsive mobile layout, and reading progress bar – **zero dependencies**.

EDUCATION

COMSATS University Islamabad, Wah Campus
Bachelor of Computer Science (BCS)
• **Coursework:** Programming Fundamentals (C++), Applications of ICT, Islamic Studies, Sociology

2026 – Expected 2030
Student ID: SP26-BCS-048

Army Public School & College (APSACS), Chakwal
FSc Pre-Engineering

2022 – 2024
